

GUIDELINES TO AUTHORS

The Journal of the Plant Protection Society Nepal publishes original research findings in the field of plant protection (Entomology, Plant Pathology and Weed Science). In addition, it also includes research notes, short communications and book reviews. Generally, manuscript consisting of field trials should have data of such trials repeated at least two times (over two seasons or locations) depending on the nature of the trial. Manuscripts from both within and outside the organization/country shall be considered for publication in the journal.

Manuscript format : All contents in the manuscript must be written in English in Times New Roman 11 font size except for references cited. Manuscripts should be neatly typed, single-spaced (including tables and references) on A4 size paper, with 1.25" margin at top and left and 1" margin at the bottom, and right sides. The first (title) page should contain only the title of the paper, author(s) name, institution(s) and email address for correspondence. The maximum length of the paper must be limited to 10 pages and electronic copy of the manuscript should be submitted to plantprotectionseociety.nepal@gmail.com. The manuscript not following the mentioned guidelines will be returned to the authors without review. The manuscript should be arranged as follows:

- 1. Title :** The title should be short, specific, and informative that easily identifies the content of the article and includes the nature of the study and the technical approach, which will be essential for key words indexing and information records.
- 2. Abstract :** The abstract, limited in 250 or less words, should be concisely presented considering a brief account of the objectives, materials and methods, results, and main conclusions. Below the abstract, provide three to five keywords in alphabetical order, separated by commas.
- 3. Introduction :** In this section, short background information, relevant review of literature (if any) and the objective of the research should be given in 2 or 3 paragraphs. Statements must be supported by citations whenever possible and often general statements are discouraged.
- 4. Materials and Methods :** Detail information on materials and methods including experimental design, treatments, plot size and any other techniques used in research as well as the year and place of the research conducted should be provided. Where methods used are already well known and the references are available within the country, the citation of a reference and the name of the method is sufficient. The statistical tools used should be clearly mentioned.
- 5. Results and Discussion :** The results and discussion may be presented separately or combined. The results should be supported by a brief but adequate data in the form of either tables, or graphic or pictorial materials. However, the same data should not be presented in more than one form. All weights and measures should be in metric system. The discussion should be related to the author(s) findings supported by similar works. A separate paragraph at the end of the discussion should be given without separate heading of "conclusion and recommendation".
- 5.1. Tables :** Keep the number of table to a minimum and avoid large tables. Borders should be minimized. Number each table with Arabic numbers (i.e. Table 1,2,3). The title, column and row headings, and footnotes of each table should be self-explanatory. Use a single asterisk (*) for 5% level and a double asterisk (**) for 1% level of significance.
- 5.2. Figures and Photographs :** Line drawing should be clearly drawn in black waterproof ink (India ink) on good quality transparent paper and scanned in quality scanner. They should be

Journal of the Plant Protection Society Nepal

clear and relevant to the subject referred. The legends to the figures and photographs should be supplied at the end of each figure or photograph in Arabic numerals (i.e. Figure 1,2,3).

- 5.3. **Heading :** Center and capitalize the main heading of the paper. Sub-heads should be on a separate line and capitalize the first letter of the first word.
- 5.4. **Scientific/Trade Names and Abbreviations :** The scientific name must be *italic* and given with authority. The first letter of the word (s) of the cultivar or breed, trade or brand names must be capitalized and abbreviate standard units such as gram (g), kilogram (kg) metric ton (t), milliliter (ml), liter (l), centimeter (cm), meter (m), and kilometer (km) following the official International System of Units abbreviation.
6. **Acknowledgements :** If any, may be given to institutions, funding agencies, and the key person(s).
7. **Literature Cited : References should be in 9 font size.** Citations of references should be listed alphabetically by names of authors. Use of anonymous should be avoided. Citations in the text should be referred by author's family name and year. The issue number of the journal (in parenthesis, immediately following the volume) should be provided. The following examples should be adopted:

Example:

1. **Book :** Single Author:

Ruttner, F. 1887. Biogeography and taxonomy of honeybees. Springer Verlag, Berlin. 284 pp.

Multiple Authors:
